

Vitaeris<sup>320</sup>

32 inch 1.3 ATA

Portable Hyperbaric Chamber

# Vitaeris<sup>320</sup>

The best and largest in our fleet of mild hyperbaric chambers, the Vitaeris 320 boasts a roomy 32" inflated diameter that comfortably seats two. Dual pumps boost inflation time and provide twice the airflow throughout the chamber. Designed specifically for the clinic, this model suits the needs of any medical office and patients. Straightforward training and basic maintenance makes the Vitaeris 320 a functional part of any practice!

## Main Body (bladder)

4psi (1.3ATA) operating pressure

Durable double-sided 44oz. urethane coated polyester weave material

Large 'top loading' entry allows patient placement using a lift system

Dual air-exchange/ regulator valves provide redundant pressure control

Patented 2-zipper seal facilitates self treatments

Air pressurization/ depressurization valve

Larger external pass-through port

## Occupant Observation

Four windows incorporated into urethane shell

Room light illuminates chamber interior

Direct audible communication with patient

With an optional lift system, a patient may easily be placed into the chamber

## Accessories

Chamber carry bag

Bolster set to cradle the chamber. Fabric covered foam construction matches chamber jacket.

Chamber frame maintains form when deflated for ease of use and reduced inflation time

Mattress contoured to fit inside the chamber. Medical grade.

## Peripheral Equipment

10ft. medical grade hose with dual pump diverter

Analog pressure gauge

High efficiency inline air filtration. Filters air down to 0.01 microns

Two double head oil-less 1/4 hp compressors with dual air intake filters
